

SAMPLE PREPARATION

FL-0160

FLEC Application Roller

Overview

The FL-0160 Application Roller is used with FL-0161 Test Plates to prepare paint and coating samples. It is manufactured from hardened, chromium-plated solid steel for a smooth, durable and dimensionally stable surface. The roller's own weight provides consistent application pressure.

Technical overview

Product code	FL-0160
Material	Hardened, chromium-plated solid steel
Application pressure	Provided by the roller's own weight
Compatibility	FL-0161 Paint & Coatings Test Plates
