

SAMPLE PREPARATION

FL-0170

FLEC Sealant Test Plate

Overview

The FL-0170 Test Plate is designed for emission measurements from sealants and other high-emitting materials. Its smaller, defined exposure area helps avoid overloading the sampling system. The plate can be dismantled for thorough cleaning between tests.

Technical overview

Product code	FL-0170
Samples	Sealants and other high-emitting materials
Exposure area	Smaller, defined area
Cleaning	Dismantlable plate

Related equipment

FL-0001 FLEC Cell
